

Michael Laprise

Preferred name: Dawn

This path has combined my interests in software and hardware computing skills, data-oriented mind, and experience absorbed via business professionals

EXPERIENCE

Project Lead & Database Administrator – Nova Scotia Community College – Institute of Technology Campus, Halifax

April 2025 – May 2025

- Lead a team of multiple System Administrators to research, compare, and find a replacement Ticketing System that fills out the requirements set out by the stakeholders and business requirements.
- Combined data governance and data security to initiate the process of applying roles and permissions for what would become groups assigned to individuals based on their job requirements.
- Performed business analysis and maintained documentation throughout the project, including workflow diagrams to help illustrate the process in which user and admins will follow.
- Reversed engineered the database for the chosen system to better understand the underlying data lifecycle with the available metadata.

Property and Corporate Legal Assistant – Blois, Nickerson & Bryson LLP (Currently known as Burchell's Wickwire Bryson LLP), Halifax

August 2022 - December 2023

- Specialized in property handling financial records and ensuring accurate transactional data.
- Kept up to date filing and tracking corporate minute books and annual renewals on behalf of clients.
- Responsible for creating a digital database for over 1000 corporate minute books for more efficient tracking and organization.

PROJECTS

CAPSTONE: SharePoint Customer Relationship Management Upgrades – Workforce Development Team – Nova Scotia Community College, Institute of Technology
